Nr. 85-13

**Gegenstand** : Bekanntgabe der EASA Emergency AD No. 2013-0217-E betreffend Triebwerk Solo 2350C

Introducing EASA Emergency AD No. 2013-0217-E concerning powerplant Solo 2350C

**Betroffen** : DG-1000

Applicability : Baureihe/variant DG-1000T

**Dringlichkeit** : 18. September 2013

In two occasions the excentric shaft of the reduction gear broke although these shafts have been the new version according to TN 4603-13 of the Solo company.

From the effective date of the AD (18. September 2013), do not operate the engine, unless the engine is modified in accordance with new instructions approved by EASA (instructions to be issued by the Solo company), which remove the operational restriction imposed by this AD.

EASA AD No.: 2013-0217-E

EMERGENCY AIRWORTHINESS DIRECTIVE

AD No.: 2013-0217-E

Date: 16 September 2013

Note: This Emergency Airworthiness Directive (AD) is issued by EASA, acting in accordance with Regulation (EC) No 216/2008 on behalf of the European Community, its Member States and of the European third countries that participate in the activities of EASA under Article 66 of that Regulation.

This AD is issued in accordance with EU 748/2012, Part 21.A.3B. In accordance with EC 2042/2003 Annex I, Part M.A.301, the continuing airworthiness of an aircraft shall be ensured by accomplishing any applicable ADs. Consequently, no person may operate an aircraft to which an AD applies, except in accordance with the requirements of that AD, unless otherwise specified by the Agency [EC 2042/2003 Annex I, Part M.A.303] or agreed with the Authority of the State of Registry [EC 216/2008, Article 14(4) exemption].

Design Approval Holder’s Name: SOLO Kleinmotoren GmbH

Type/Model designation(s): Solo 2350 C engines

TCDS Number: EASA.E.219

Foreign AD: Not applicable

Supersedure: None

ATA 72 | Engine – Operation Restriction

Manufacturer(s): Solo Kleinmotoren GmbH

Applicability: Solo Model 2350 C engines, all manufacturer serial numbers, equipped with a non-foldable propeller.

These engines are known to be installed on, but not limited to, DG-Flugzeugbau Model DG-1000T powered sailplanes.

Reason: An occurrence of Solo 2350 C engine shaft failure and consequent propeller detachment was reported. The preliminary investigation revealed that the failed shaft was earlier modified in accordance with an approved method.

This condition, if not corrected, could lead to additional cases of release of the propeller from the engine, possibly resulting in damage to the sailplane, or injury to persons on the ground.

For the reasons described above, this AD prohibits operation of the engine.

This AD is considered to be a temporary measure and further AD action will follow.

Effective Date: 18 September 2013
